Cautionary Statement Regarding Forward-looking Statements

※Forecast figures in this document are based on current economic and market conditions. As changes in the global economy and information services market are possible, NTT DATA Group cannot guarantee their accuracy.

※Services, products, and other names contained within this handout are trademarks, registered or otherwise, of NTT DATA Corporation or other companies.
Results for the First Quarter of Fiscal Year Ending March 31, 2022
Favorable results in both domestic and overseas businesses, and steady progress toward full-year forecasts.

• New orders received decreased due to fewer orders of domestic large-scale projects than the previous fiscal year.
• Net sales increased due to sales growth in all segments and the impact of foreign exchange rates.
• Operating income increased due to sales growth and seeing results of overseas Structural Transformation.

(Billions of Yen, %)
New Orders Received: YoY Changes by Business Segment (1Q FYE3/2021 and 1Q FYE3/2022)

(Billions of Yen)

- Public & Social Infrastructure Decreased due to fewer orders of large-scale projects for the central government and ministries than in the previous fiscal year.
- Financial Decreased due to fewer orders of large-scale projects for banks than in the previous fiscal year.
- Enterprise & Solutions Increased mainly due to winning of projects for manufacturing industry.
- North America Decreased mainly due to delay in the timing of contract of a large-scale project.
- EMEA & LATAM Increased mainly due to winning of projects in Spain, etc. and the impact of foreign exchange rates.

© 2021 NTT DATA Corporation
Net Sales: YoY Changes by Business Segment (1Q FYE3/2021 and 1Q FYE3/2022)

**Public & Social Infrastructure**
Increased mainly due to the expansion in the scale of services for the telecom industry.

**Financial**
Increased mainly due to the expansion in the scale of services for financial institutions.

**Enterprise & Solutions**
Increased mainly due to the expansion in the scale of services for the manufacturing industry and retail and service sectors.

**North America**
Increased mainly due to the expansion in the scale of services for Healthcare and financial institutions driven by less impact of Covid-19, and also the impact of foreign exchange rate.

**EMEA & LATAM**
Increased due to the expansion in the scale of services driven by less impact of Covid-19 mainly in Spain, and also the impact of foreign exchange rate.
Public & Social Infrastructure
Although there was an increase by sales growth, remained on par with the last fiscal year mainly due to cost increase by proposal activity for expanding our business fields.

Financial
Increased mainly due to sales growth.

Enterprise & Solutions
Increased mainly due to sales growth and increased profitability driven by less impact of covid-19.

North America
Increased due to sales growth, decrease in the expense and seeing results of Structural Transformation.

EMEA & LATAM
Increased due to sales growth and seeing results of Structural Transformation.

| Grow digital and consulting  
Improve profitability in traditional services                                 | • On track  
Won several digital & consulting deals, including digitalization in traditional domain.                                                             |
| Strengthen digital capabilities by enhanced digital talent management      | • Further strengthening digital capabilities through acquisitions  
Completed the acquisition of Nexient to strengthen digital focus areas including application development and modernization in cloud environment. |
| Accelerate portfolio reshaping for continuous business domain transformation| • Transitioning to digital-centric business domain  
Accelerated divestitures of non-core/non-digital businesses.                                                                                     |
| Integrate into a global brand to increase presence for Clients             | • On track  
Operations to be integrated under NTT DATA EMEAL, a new regional headquarters, from the middle of September, 2021.       |
| Develop a stronger ability to adapt to the digital shift in markets and changes in work styles | • Executing initiatives as planned  
Executing office optimization to adapt to changing working styles                                                                                  |
| Increase digital capabilities by securing more digital talent & assets     | • On track  
Increasing digital projects by expanding digital talent pool.                                                                                     |
Appendices
- Business topics -
In October 2020, NTT DATA established the Social Design Office. Since then, actions have been implemented to develop a more valuable social system from the consumer’s perspective. As a part of this action, in June 2021, NTT DATA launched cashless service for the national treasury, a total service that enables cashless application both at the counter and online platform of the central government.

This is Japan’s first service that enables payment by credit card or transportation IC card upon application at the counter by aligning with multiple related systems required to process the payment to the national treasury at the counter and by handling the accounting process specific to the central government. If each ministry and agency use this service, the applicant making the payment to the national treasury (Note 1) can pay without bringing in cash at the counter and buying a revenue stamp, which is required for cash payment. Likewise, in online application, this service allows the applicant to make a payment just by inputting their credit card number and other details, leading to the considerably improved usability.

NTT DATA will continue promoting their cashless payment service to the national treasury by proposing this service to ministries and agencies sequentially. Moreover, we will effectuate the implementation of self-registers and automated certificate issuers at the counter to further reduce the burden of applicants and ministry officials.

(Note 1) Payment to the national treasury
Payment of revenues and taxes to the nation by individuals and corporations.
In April 2021, NTT DATA concluded a basic agreement for the next renewal of MEJAR, a system jointly used by each bank (Note 1) with the following five banks: The Bank of Yokohama, Ltd., Higashi-Nippon Bank, Ltd. of Concordia Financial Group, Ltd., The Hokuriku Bank, Ltd., The Hokkaido Bank, Ltd., and The 77 Bank, Ltd. of Hokuhoku Financial Group, Inc.

Based on this agreement, the next MEJAR, developed by NTT DATA, adopts an open mission-critical platform (hereafter the OMC platform (Note 2)) and is capable of flexibly and promptly responding to environmental changes to realize thorough efficiency. It is scheduled to be launched in 2024. The adoption of the OMC platform can reduce hardware costs and realize an open platform, making effective use of existing assets. Each bank's investment in IT is expected to be lower than in the past. This initiative is the first in the banking industry as a jointly used accounting system.

NTT DATA will consider standardizing, communalizing, automating, and applying cloud computing for the development/operating methodology of mission-critical systems, as we will apply the OMC platform to mission-critical systems (Note 3) sequentially.

(Note 1) MEJAR
Built in 2010 and based on NTT DATA’s standard banking application, BeSTA (Banking application engine for STandard Architecture) that does not specify vendors, MEJAR is a highly stable and jointly used system. By sharing wide-ranging non-core systems, the client can secure the high-cost advantage.

(Note 2) Open mission-critical platform
This is a middleware product being developed by NTT DATA. It enables online or batch programs, which used to run on the mainframe platform, to be continuously used to realize high reliability required for the mainframe on an open platform.

(Note 3) Mission-critical systems
These are material systems that are socially influential. As such, they are required to have high reliability, availability, and performance.
NTT DATA Launches On-Site Work Support Services through AR-technology-enabled 3D Manual

In May, 2021, NTT DATA launched work support services that use WorkLink, which is a platform that simultaneously allows the user to use work support based on the 3D manual (**Note 1**) realized by Augmented Reality (AR) and work support by experts in a remote location, developed by Scope AR in the United States.

The spread of Covid-19 infection has increased the need for remote work support or pre-work training. NTT DATA is the first Japanese company to sign a partnership agreement with Scope AR, a company that provides the WorkLink platform for work support in manufacturing/maintenance in the manufacturing industry and maintenance/inspection in utilities industry such as electricity, gas, and water. We are determined to provide Scope AR’s platform coupled with our 3D manual creation support service to users. Based on product manuals or maintenance procedure manuals that they own, this support service helps the user import into a 3D manual by scanning work target equipment and to additionally implement the work procedure in 3D animation that cannot be expressed by existing manuals, thereby supporting high-quality 3D manuals. Through DX consulting as field services, we will also provide the services in collaboration with other integration services including ServiceNow that contribute to efficient operation.

By the end of FY2024, we aim to sell these services to more than 100 companies in the manufacturing, utilities, and distribution industries.

---

**Note 1**

3D manual

A manual that displays work target equipment or operation procedures reproduced into 3D images on the user’s monitor.
Enhanced digital expertise through acquisition and accelerated digital transformation services to support clients with Long-Term Relationships

NTT DATA Services, a subsidiary of NTT DATA Corporation, accelerated our digital expertise through acquisition. By utilizing enhanced digital offerings, NTT DATA Services is supporting clients in accelerating digital transformation.

• NTT DATA Services acquired Nexient, LLC, a cloud-native (Note1) company that expands NTT DATA’s differentiating transformation, modernization and cloud app development experience, in June 2021. With Nexient’s agile, product-minded development disciplines with U.S.-based delivery, NTT DATA added user-centric full stack product development capabilities and will speed the ability to offer sophisticated digital transformation services to clients, including digital product strategy, product design and development, and platform transformation. Through this acquisition, NTT DATA also enhanced the hiring and training process in this field.

• NTT DATA Services has been awarded a large multi-year contract extension with a leading global hospitality company as their digital partner for IT outsourcing including application development and maintenance in July 2021. Our strong delivery performance in the past and digital expertise such as in cloud and ServiceNow were instrumental in extending the contract (Note2).

NTT DATA continues its journey to be the preferred digital partner in the market and supports clients in accelerating digital transformation in North America and globally.

(Note 1) Cloud-native
An approach to take the advantages of the cloud computing model for application development or maintenance, etc.
(Note 2) This deal will be included in our new orders received in 2nd Quarter.
