

Continuously selected for the World Index of the Dow Jones Sustainability Index, an ESG Investment Index

NTT DATA Corporation

On September 14, 2019 NTT DATA Corporation (hereafter NTT DATA) was selected for inclusion in the World Index of the Dow Jones Sustainability Index (DJSI), the world's leading ESG investment index for the third successive year.

Under the corporate philosophy of “creating new paradigms and values with information technology to contribute to a more affluent and harmonious society,” NTT DATA seeks to improve its corporate values by way of its IT services business as well as to contribute to the creation of a sustainable society on a global scale.

[About the DJSI]

The DJSI is a stock index, jointly developed by S&P Dow Jones Indices in the US and RobecoSAM in Switzerland in 1999. Every year it evaluates corporate sustainability in terms of ESG to select comprehensively superior companies, also taking into account their market capitalization. In view of sustainability, it selects top companies in each industry sector for inclusion in the World Index. In 2019, the World Index selected 318 companies (of which 33 were Japanese) from about 3,500 major companies across the world. The Asia Pacific Index chose 148 companies (of which 76 were Japanese) from the 600 leading companies in the region.

[Selected Indices]

Two indices: the DJSI World and the DJSI Asia Pacific

NTT DATA Group's business activities were highly valued in terms of their regard for environmental efficacy, labor practices, human resources development, and other various efforts. NTT DATA was selected for inclusion in the World Index (of which only 3 were Japanese) in the TSV IT services and Internet software industry category. Since 2009, it has been continuously selected for the Asia Pacific Index composed of companies from the Asia Pacific region. It was chosen for the index in 2019 as well, concurrently with the World Index.

In addition to the selection by the DJSI, NTT DATA has been selected for a number of ESG investment indices, including the FTSE Blossom Japan Index, an ESG index selected by the Government Pension Investment Fund (GPIF), the world's largest pension fund.
