Everest Group PEAK Matrix® for S/4HANA Service Providers 2021

Focus on NTT DATA
May 2021
Background of the research

- Enterprises are adopting SAP S/4HANA to modernize their finance and accounting operations, enable end-to-end visibility across the supply chain, better forecast demand and sales, optimize inventory management, and streamline procurement operations.
- However, enterprise expectations are evolving beyond the lift and shift of workloads and process reimagination to ecosystem orchestration using S/4HANA to better orchestrate their enterprise application landscape to reap incremental value.
- To address changing client expectations and accelerate the migration of its on-premise client base to the cloud, SAP is investing in augmenting its SAP product portfolio including S/4HANA Cloud capabilities.
- In this research, we present an assessment of 21 service providers featured on the S/4HANA services PEAK Matrix®.
- The assessment is based on Everest Group’s annual RFI process for calendar year 2020, interactions with leading services providers, client reference checks, and an ongoing analysis of the S/4HANA services market.

This report includes the profiles of the following 21 leading service providers featured on the S/4HANA services PEAK Matrix:

- **Leaders**: Accenture, Deloitte, EY, IBM, Infosys, NTT DATA, and TCS.
- **Aspirants**: Birlasoft, Mphasis, Stefanini, and UST.

Scope of this report:

- **Geography**: Global
- **Service providers**: 21
- **Services**: SAP S/4HANA services
Introduction and scope

Everest Group recently released its report titled “S/4HANA Services PEAK Matrix® Assessment 2021”. This report analyzes the changing dynamics of the S/4HANA services landscape and assesses service providers across several key dimensions.

As a part of this report, Everest Group updated its classification of 21 service providers on the Everest Group PEAK Matrix® for S/4HANA services into Leaders, Major Contenders, and Aspirants. The PEAK Matrix is a framework that provides an objective, data-driven, and comparative assessment of S/4HANA service providers based on their absolute market success and delivery capability.

Based on the analysis, NTT DATA emerged as a Leader. This document focuses on NTT DATA’s S/4HANA services experience and capabilities and includes:

- NTT DATA’s position on the S/4HANA services PEAK Matrix
- Detailed S/4HANA services profile of NTT DATA

Buyers can use the PEAK Matrix to identify and evaluate different service providers. It helps them understand the service providers’ relative strengths and gaps. However, it is also important to note that while the PEAK Matrix is a useful starting point, the results from the assessment may not be directly prescriptive for each buyer. Buyers will have to consider their unique situation and requirements, and match them against service provider capability for an ideal fit.

S/4HANA services PEAK Matrix® characteristics

Leaders:
Accenture, Deloitte, EY, IBM, Infosys, NTT DATA, and TCS
- Leaders are characterized by their ability to successfully execute large-scale, multi-continent, end-to-end S/4HANA services, underpinned by their strong global delivery network and meaningful onshore presence
- These providers have invested significantly to grow and engage talent to combat high attrition in the S/4HANA services market. Leaders are also able to successfully leverage domain experts to provide good change management experiences to clients
- Furthermore, they have a mature suite of SAP-certified, S/4HANA, OTS verticalized solutions to accelerate time-to-market for their clients
- Leaders have a highly balanced portfolio, and continue to keep pace with market dynamics through continued investments in S/4HANA Cloud and vertical-specific solutions and services capability development (internal IP/tools, partnerships, etc.)

Major Contenders:
Atos, Capgemini, Cognizant, DXC Technology, HCL Technologies, LTI, PwC, Tech Mahindra, T-Systems, and Wipro
- These players have built meaningful capabilities to deliver S/4HANA services – implementation and management/run; however, their service portfolios are not as balanced and comprehensive as those of Leaders (in terms of coverage across S/4HANA service segments, service type, geographies, or verticals)
- These providers have good partnership with SAP and all the leading cloud vendors & specialist technology partners to curate client-specific S/4HANA solutions
- Also, Major Contenders are making continued investments in building proprietary tools and solutions, as well as scaling their talent for S/4HANA

Aspirants:
Birlasoft, Mphasis, Stefanini, and UST
- Aspirants have good proof points in delivering low to medium complex implementation and maintenance S/4HANA services for Small and Mid-sized Buyers (SMBs)
- They are either focused on a region(s) or vertical(s), or currently have a relatively small S/4HANA practice
- While these providers have meaningful capabilities in driving S/4HANA on-premise initiatives, they might not be suitable for clients looking for S/4HANA Cloud services as they lack strong partnerships with leading cloud vendors
Everest Group S/4HANA Services PEAK Matrix® Assessment 2021

1 Assessments for Deloitte, EY, IBM, PwC, and T-Systems exclude service provider inputs and are based on Everest Group's proprietary Transaction Intelligence (TI) database, service provider public disclosures, and Everest Group’s interactions with buyers.

Source: Everest Group (2021)
**Strengths**

- NTT DATA is a right fit for enterprises in the APAC and European regions seeking stand-alone, onshore-centric end-to-end services for S/4HANA.
- Enterprises in the Latin American and ASEAN regions can benefit from its acquisition of ISS Consulting and FH S.A.’s S/4HANA delivery capabilities in the region.
- Its flexibility in engagement, domain expertise, and account management are well-perceived by the market.
- It has meaningfully invested in upskilling initiatives for S/4HANA resources through its dedicated S/4HANA academy.
- Unlike its peers, it has a scaled pool of S/4HANA Cloud resources and has demonstrated proof points in driving S/4HANA SaaS transformations.
- It has heavily invested in building a robust suite of verticalized solutions/framework for S/4HANA to deliver industry-specific solutions.

**Limitations**

- NTT DATA needs to further enhance its delivery capabilities and proof points in North America and Middle East and Africa to better serve clients in these regions.
- Its onshore-/nearshore-centric delivery model may prevent clients from capturing labor arbitrage opportunities – it can further scale resources in offshore locations such as India and the Philippines.
- It needs to invest in improving mindshare of its proprietary SAP-certified, industry-specific S/4HANA-compatible solutions.
- It has scope to further enhance its organizational change management capabilities to better serve its clients post-implementation in enabling adoption and consumption of the solution.
- NTT DATA needs to further augment its capabilities around human resources to strengthen its S/4HANA services portfolio.
Provider overview

Vision for S/4HANA services: NTT DATA’s vision is to drive S/4 HANA transformations anchored in outcomes focused on sustainable improvements in business performance. It aims to leverage its industries vision, business offerings, process expertise, as well as proprietary SAP solutions and IP to reduce risk and increase speed, drive agility, and enhance cost efficiency to bring the vision to life.

Partnership status with SAP: SAP Global Strategic Service Partner

Number of projects completed in 2020: 529
Number of S/4HANA experts: 9,300+

</tr>
</thead>
</table>
### Case studies

<table>
<thead>
<tr>
<th>Case study 1</th>
<th>Client: A large international manufacturer</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Business challenge</strong></td>
<td>The client wanted to globally orchestrate all operations and management from machine installment to multi-year maintenance, but fragmented ERPs and rules formed obstacles to standardized operations</td>
</tr>
<tr>
<td><strong>Solution</strong></td>
<td>NTT DATA implemented the entire program as its global SAP partner for the client’s group of companies, from blueprint to rollouts and after go-live maintenance of S/4.</td>
</tr>
</tbody>
</table>
| **Impact** | - Standardized operations globally for greater ROI  
- Gained real-time P&L management for each machine to enable optimized production and better decision-making |

<table>
<thead>
<tr>
<th>Case study 2</th>
<th>Client: A global pharmaceutical company</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Business challenge</strong></td>
<td>The client’s expanding global business required a scalable core solution across all subsidiaries and geographies</td>
</tr>
<tr>
<td><strong>Solution</strong></td>
<td>NTT DATA implemented the full S/4HANA solution for all pharmaceutical operations using proven assets (sets of internal IPs and industry models.) Included integration with other systems and construction of management cockpit for analytics, simulations, risk management, and operations</td>
</tr>
</tbody>
</table>
| **Impact** | - Achieved significant performance enhancements that shortened operations lead times  
- Integrated big data not only for prompt result confirmation, but also predictions and simulations  
- Simplified system to enable both significant TCO reduction and flexibility at the same time |
Appendix
Everest Group PEAK Matrix® is a proprietary framework for assessment of market impact and vision & capability

- **Vision & capability**
  - Measures ability to deliver services successfully
  - **Leaders**
  - **Major Contenders**
  - **Aspirants**
Services PEAK Matrix® evaluation dimensions

Measures impact created in the market – captured through three subdimensions

**Market adoption**
Number of clients, revenue base, YOY growth, and deal value/volume

**Portfolio mix**
Diversity of client/revenue base across geographies and type of engagements

**Value delivered**
Value delivered to the client based on customer feedback and transformational impact

Measures ability to deliver services successfully. This is captured through four subdimensions

**Vision and strategy**
Vision for the client and itself; future roadmap and strategy

**Scope of services offered**
Depth and breadth of services portfolio across service subsegments/processes

**Innovation and investments**
Innovation and investment in the enabling areas, e.g., technology IP, industry/domain knowledge, innovative commercial constructs, alliances, M&A, etc.

**Delivery footprint**
Delivery footprint and global sourcing mix
FAQs

Does the PEAK Matrix® assessment incorporate any subjective criteria?
Everest Group’s PEAK Matrix assessment adopts an unbiased and fact-based approach (leveraging service provider / technology vendor RFIs and Everest Group’s proprietary databases containing providers’ deals and operational capability information). In addition, these results are validated / fine-tuned based on our market experience, buyer interaction, and provider/vendor briefings.

Is being a “Major Contender” or “Aspirant” on the PEAK Matrix, an unfavorable outcome?
No. The PEAK Matrix highlights and positions only the best-in-class service providers / technology vendors in a particular space. There are a number of providers from the broader universe that are assessed and do not make it to the PEAK Matrix at all. Therefore, being represented on the PEAK Matrix is itself a favorable recognition.

What other aspects of PEAK Matrix assessment are relevant to buyers and providers besides the “PEAK Matrix position”?
A PEAK Matrix position is only one aspect of Everest Group’s overall assessment. In addition to assigning a “Leader”, “Major Contender,” or “Aspirant” title, Everest Group highlights the distinctive capabilities and unique attributes of all the PEAK Matrix providers assessed in its report. The detailed metric-level assessment and associated commentary is helpful for buyers in selecting particular providers/vendors for their specific requirements. It also helps providers/vendors showcase their strengths in specific areas.

What are the incentives for buyers and providers to participate/provide input to PEAK Matrix research?
- Participation incentives for buyers include a summary of key findings from the PEAK Matrix assessment
- Participation incentives for providers/vendors include adequate representation and recognition of their capabilities/success in the market place, and a copy of their own “profile” that is published by Everest Group as part of the “compendium of PEAK Matrix providers” profiles

What is the process for a service provider / technology vendor to leverage their PEAK Matrix positioning and/or “Star Performer” status?
- Providers/vendors can use their PEAK Matrix positioning or “Star Performer” rating in multiple ways including:
  - Issue a press release declaring their positioning. See citation policies.
  - Customized PEAK Matrix profile for circulation (with clients, prospects, etc.)
  - Quotes from Everest Group analysts could be disseminated to the media
  - Leverage PEAK Matrix branding across communications (e-mail signatures, marketing brochures, credential packs, client presentations, etc.)
- The provider must obtain the requisite licensing and distribution rights for the above activities through an agreement with the designated POC at Everest Group.

Does the PEAK Matrix evaluation criteria change over a period of time?
PEAK Matrix assessments are designed to serve present and future needs of the enterprises. Given the dynamic nature of the global services market and rampant disruption, the assessment criteria are realigned as and when needed to reflect the current market reality as well as serve the future expectations of enterprises.
Everest Group is a research firm focused on strategic IT, business services, engineering services, and sourcing. Our clients include leading global companies, service providers, and investors. Clients use our services to guide their journeys to achieve heightened operational and financial performance, accelerated value delivery, and high-impact business outcomes.
