

SAP on Azure Offerings

SAP on Azure Scale Factory Service

NTT DATA is a Trusted Global Innovator of IT and business services headquartered in Tokyo. Our Microsoft Center of Excellence helps companies move and leverage on cloud solutions with ease. As a premier Systems Integrator, we know both your source and target systems inside-out: our team has met rigorous certification and deep expertise on multiple capabilities and heterogenous platforms delivering IT in the most cost-effective manner while mitigating technology and business risks.

Solution Value Proposition

NTT DATA's SAP on Azure offer is a step-by-step manageable approach to moving SAP ECC to Azure cloud using repeatable tactics and tools allowing SAP customers to kick start their SAP modernization with ease and confidence while reducing the risk, cost and effort.

SAP on Azure Cloud Journey

Leverage Microsoft Azure Cloud through our SAP on Azure Scale Factory service. Below is our high-level migration approach to Azure.

Plan	Design	Migrate	Manage	Innovate
<p>Gain clarity and confidence on where and how to start your SAP modernization journey roadmap.</p>	<p>Reduce your risk by planning and designing for governance, prior to migrating workloads in the cloud.</p>	<p>Near-Zero Downtime</p> <p>40% to 75% percent savings on Azure over traditional hosting scenarios.</p>	<p>Best-in-class Azure infrastructure support through our unique support model, powered by our contact center & certified Microsoft experts.</p>	<p>Modernize your existing SAP ECC to S/4HANA with NTT DATA's Move2S4 conversion service.</p>

Our Solution Offerings

Plan	Design	Migrate	Manage	Innovate
<ul style="list-style-type: none"> - Assess existing infrastructure - Plan and map out target state 	<ul style="list-style-type: none"> - Design for ideal SAP architecture - Design and implement landing zone in Azure - Migration options (backup/restore, replication, etc.) 	<ul style="list-style-type: none"> - Move SAP on-premises workloads to Azure cloud - Migrate SAP functions to SAP on Azure features (Azure Backup, Recovery Services Vault, Azure Monitor for SAP Solutions, etc.) 	<ul style="list-style-type: none"> - 9 x 5 Level 2 infrastructure support for your Azure workloads 	<ul style="list-style-type: none"> - Plan and design for SAP modernization - Innovate beyond SAP with Big Data, IOT, and Digital Solutions
