

Smart System Conversion: Promote your SAP System to the Intelligent Business Suite

Moving to S/4HANA

There are multiple options available for moving from an existing SAP ECC 6.0 system to S/4HANA – one of which is converting your existing ERP system. Conversion of your existing system enables you to reap the benefits of S/4HANA with some Fiori activation and business process adaptation or while retaining existing data. Depending on your business requirements, conversions can enable a “technical” conversion can be a full transition to S/4HANA with full usage of the Fiori UX. This depends on what best suits your business strategy.

NTT DATA Business Solutions has supported businesses through the decision process and system conversion projects. We are a global leader in S/4HANA.

Experts in COE

A Packaged Solution for Your Move

Based on our experience we developed our move2S4 System Conversion offering which provides a proven methodology and automation tools to transition from ECC 6.0 to S/4HANA. Full system conversion of ECC 6.0 with 4 tier landscape (Sandbox, DEV, QA, PRD) starting from 22 weeks.

Not sure how you want to move?

With move2S4, NTT DATA offer you an option to trial your system on S/4HANA prior to a full conversion. This will enable you to identify potential risk areas and overall effort/timings. In addition, your users can access S/4HANA with their current, known data to get an early appreciation for the new user experience and the benefits provided from the new processes. Sandbox conversions starting from 10 weeks.

Benefits:

- NTT DATA accelerators simplify the process
- Usage of automated tools to provide quality, repeatable process
- Fixed price offering provides you with a define project cost

Offering includes:

- OSS notes installation, required for conversion
- CVI (Customer Vendor Integration) 1:1 migration option – no redesign for Business Partner Model
- New GL migration through system conversion tools (classic GL functionality)
- SAP unicode ECC EHP7 or higher (other EHP and non-unicode at additional cost)
- 4 tier landscape, 1 client per system
- Up to 5 company codes
- Up to 10 years of finance documents
- Custom Code Remediation using automated tools
- Weekly update calls (WebEx)
- SAP ECC core modules: FI, CO, MM, SD, PP, QM, PS, PM, CS, WM
- All mandatory FIORI Apps (App establishment, frontend server setup and configuration not included)
- All necessary configuration for pre- and post-conversion activities for mandatory changes
- Technical system conversion using SAP tools
- Documentation and presentations
- Fixed price offering provides you with a defined project cost
