

Financial Service

Driving the future of payment to meet consumer expectations

A card-based system has been transformed into a more complex system where users can make a payment on websites or mobile applications. The financial sector must address more complex customer needs as well as complying with new national regulations and payments standards. To compete successfully in payment services, your business needs to be flexible enough to address the ever-changing needs of customers and updated regulations, whilst guaranteeing customer satisfaction and loyalty.

NTT DATA Thailand is a major player in credit card payment solutions in processing high-volume electronic transactions in Thailand. We specialize in end-to-end payment services including issuing, acquiring and developing payment technology solutions, card processing, mobile payment and Business Intelligence. In addition, our card and payment services are designed to serve end-to-end card processing with features that allow customers to respond to market demands effectively, optimize investment and maximize returns.

Our technology can lead you in the digital payment world

 <p>Seamless Buying Journey</p>	NTT DATA's Card and Payment Services aim to accelerate the move to digital payments and create a seamless buying journey, unlocking the potential for millions of consumers to spend more freely.
 <p>Unified Platform for Cross Border</p>	We help global merchants process and manage local and cross-border transactions in multiple currencies for their international business through a single platform. Merchants can benefit from innovative payment solutions which are designed to help their business capture new marketing opportunities.
 <p>Global Presence, and Local Expertise</p>	We combine local expertise in Japan, Malaysia, Vietnam, Hong Kong, China, Thailand, Philippines, Indonesia, Cambodia and India, including agility with centrally coordinated access to global resources.

Service Offering

NTT DATA Thailand offers payment solutions to financial institutions in Thailand and across the Asia Pacific region. The company provides end-to-end payment solutions with various payment products, from acquiring services to accept all payment methods and alternative payments including online payments via a payment gateway, issuing cards including credit cards, prepaid cards, fleet cards, loan cards, to mobile payment solutions.

In addition to these solutions, NTT DATA Thailand is an expert in digitising financial businesses, offering business consulting, implementation and management services.

Digital Ecosystem & Platform

The new model helps you customise the customer journey using predictive models and provide hyper-personalized experiences. Banks and financial institutions that successfully address these trends benefit significantly from them; for example, by improving customer experience, managing risk more effectively, reducing operating costs, and future proofing.
